

## Indoor Enclosures

*Rainford Solutions draw upon their 25 years of experience in the design and manufacture of a wide variety of indoor telecoms and datacoms equipment enclosures. This range includes:*

- *Network Equipment Enclosures*
- *Co-location Racks*
- *Customer Premises Equipment*

Internal Enclosures are available from either one of the companies 'Standard Ranges' such as the tried and tested IR10 indoor cabinet, or can be designed specifically from a vast portfolio of design 'Building Blocks' these include:-

- feature rich aluminium extrusions or formed chassis assemblies,
- IP and EMC seal profiles,
- fixed integral panels or removable cladding members,
- 19", 23" or ETSI standard equipment mounting assemblies,
- vented, glazed or steel doors with single or multi point locking systems,
- Range of cable management and power supply accessories.
