Project: Rainford invest in a new state-of-the-art punching machine

Rainford invest in a new state-of-the-art punching machine:

Rainford Solutions, a world-class manufacturer of high quality electronic enclosure protection solutions is pleased to announce its investment in a new Amada EM 6312 ZRT punching machine, which has been commissioned at its UK manufacturing facility in St Helens, Merseyside.

Cutting edge technology:

The new Amada EM 3612 ZRT punching machine is packed with cutting edge technology, which delivers high quality, high speed and high productivity processing. The highly automated turret punch press comprises of a 300 station tool storage unit and high speed automatic tool changing, reducing programming time and machine downtime. Additional productivity enhancing features and benefits of the new Amada EM 3612 ZRT machine include scratch free processing with a concealed lower turret, ID Tooling system for digital tool control and a range of automated sheet load/unload options. This outstanding machine is compact and efficient; delivering flexibility and versatility. With easy to use AMNC touch screen control and continuous production processing a reliable and high performance operation is guaranteed at Rainford.

State-of-the-art manufacturing:

Rainford are continuously looking for ways to improve the business, this major investment demonstrates their commitment to an ongoing investment strategy. By improving its existing capabilities and service offering Rainford's board of director's aim is to focus on the best cutting edge technology available within the marketplace. In return Rainford can continue providing a stable, high quality processing service providing high quality products and optimum performance at all times to give its customers a highly competitive advantage using the latest cutting edge technology in punching solutions with improved capacity and capability.
