

Standard Range of Seismic Zone 4 Products

Product Datasheet

Key Features:

- ✓ NEBS Zone 4 certified
- ✓ Standard height 47U
- ✓ Width: 600mm
- ✓ Depth: 300mm, 600mm, 800mm, 1000mm
- ✓ Other sizes available upon request
- ✓ Fully welded steel construction
- ✓ 19" and ETSI standard
- ✓ Supplied fully assembled

Product Overview:

The Vanquish® S-Series Seismic cabinet is a NEBS Zone 4 certified rack for extreme load conditions. The fully welded frame structure has been seismically tested and officially certified by a third party test centre. The rugged design is engineered to perform in areas of high seismic activity and vibration or areas with high load capacities.

Cabinets are supplied fully assembled ready for immediate deployment.

Industry Standards:

- ✓ NEBS Telcordia GR-63-CORE
- ✓ Designed and manufactured in the UK under ISO 9001

Seismic Testing:

Testing is in accordance with NEBS specification GR-63-CORE for Zone 4 and European Telecommunications Standards Institute (ETSI) EN 300 019-2-3 v2.4.1 Environmental Conditions and Environmental Tests for Telecommunications Equipment; Part 2-3: Tested with 500kg of equipment installed.

Cabinet Size Range:

Cabinet Sizes	Height	Width mm	Depth mm
Vanquish® S-Series Seismic Rack	47U	600	300
Vanquish® S-Series Seismic Cabinet	47U	600	600
Vanquish® S-Series Seismic Cabinet	47U	600	800
Vanquish® S-Series Seismic Cabinet	47U	600	1000
